

Avoid Costly Security Breaches With 5 Key Measures

[Read the Checklist](#)

Defending enterprise data from cyberattacks is a constant battle. Any breach of your organization's network can lead to a substantial loss of reputation, trust, and financial health.

With so much attention given to the newest and most sophisticated types of cybersecurity infrastructure, safeguarding the security of company hardware is often overlooked. Vulnerable hardware presents a significant hazard and addressing it must be part of your security-focused workplace culture.

Read our checklist to determine whether you've put in place five of the top defense strategies security professionals advocate, including the following measures:

- **Endpoint-to-edge infiltration protection measures**
- **Desktop devices with built-in security protection**
- **Comprehensive cybersecurity training for all members of your workforce**

By taking the proper mitigation steps, you can protect your organization from damaging cyberattacks.

Reinforce Your Defenses With the Right Security Partner

Computer Integration Technologies, Inc. (CIT), an HP Silver Partner, offers a broad range of managed services, cybersecurity, hybrid IT solutions, and other services to support business growth. As a one-stop solution for all things IT, you can rely on us to keep your technology up-to-date and up-to-speed. By joining with top leaders in the technology industry, we support the products and services our clients need.
